B. Procedure ...................................................................................................... A-1

## ATTACHMENT A

## 1 N PROCEDURE

## A. APPLICABILITY

1. This procedure may be used to provide substitute data for affected sources that meet the specified conditions in Chapter 2, Subdivision E, Paragraph 1, Subparagraph b, clause i and Chapter 2, Subdivison E, Paragraph 2, Subparagraph c, clause i.

## B. PROCEDURE

1. Where N is the number of hours of missing emissions data, determine the substitute hourly $\mathrm{SO}_{\mathrm{X}}$ concentration (in ppmv), the fuel gas sulfur content (in ppmv), or the hourly flow rate (in scfh) by averaging the measured or substituted values for the 1 N hours immediately before the missing data period and the 1 N hours immediately after the missing data period.
2. Where 1 N hours before or after the missing data period includes a missing data hour, the substituted value previously recorded for such hour(s) pursuant to the missing data procedure shall be used to determine the average in accordance with Subdivision B, Paragraph 1 above.
3. Substitute the calculated average value for each hour of the N hours of missing data.

## EXAMPLES OF 1 N PROCEDURE <br> EXAMPLE 1

| HOUR | DATA POINT (LB/HR) |
| :---: | :---: |
| 1:00 A.M. | 30 |
| 2:00 A.M. | 25 |
| 3:00 A.M | 32 |
| 4:00 A.M. | 34 |
| 5:00 A.M. | Missing |
| 6:00 A.M. | Missing |
| 7:00 A.M. | Missing |
| 8:00 A.M. | 27 |
| 9:00 A.M. | 22 |
| 10:00 A.M. | 25 |
| 11:00 A.M | 30 |

To fill in the missing three hours, take the data points from the 3 hours before and the 3 hours after the missing data period to determine an average emission over the 3 hours
average emissions $=\frac{25+32+34+27+22+25}{6}=27.5 \mathrm{lb} / \mathrm{hr}$.

The filled in data set should read as follows:
EXAMPLE 1 (continued)

| HOUR | DATA POINT (LB/HR) |
| :---: | :---: |
| 1:00 A.M. | 30 |
| 2:00 A.M. | 25 |
| 3:00 A.M. | 32 |
| 4:00 A.M. | 34 |
| 5:00 A.M. | 27.5 |
| 6:00 A.M. | 27.5 |
| 7:00 A.M. | 27.5 |
| 8:00 A.M. | 27 |
| 9:00 A.M. | 22 |
| 10:00 A.M. | 25 |
| 11:00 A.M. | 30 |

## EXAMPLES OF 1 N PROCEDURE

EXAMPLE 2

| HOUR | DATA POINT (LB/HR) |
| :---: | :---: |
| 1:00 A.M. | 45 |
| 2:00 A.M. | 50 |
| 3:00 A.M. | 53 |
| 4:00 A.M. | Missing |
| 5:00 A.M. | Missing |
| 6:00 A.M. | Missing |
| 7:00 A.M. | 58 |
| 8:00 A.M. | Missing |
| 9:00 A.M. | 48 |
| 10:00 A.M. | 45 |

In this example the missing data point at 8 A.M. is in the 3-hour period after the 3 - hour missing data period. We first fill the 8.A.M. slot. average emissions for 8 A.M. $=\frac{58+48}{2}=53$

The filled in data sheet at this point should read as follows:

EXAMPLE 2 (continued)

| HOUR | DATA POINT (LB/HR) |
| :---: | :---: |
| 1:00 A.M. | 45 |
| $2: 00$ A.M. | 50 |
| 3:00 A.M. | 53 |
| 4:00 A.M. | Missing |
| 5:00 A.M. | Missing |
| 6:00 A.M. | Missing |
| $7: 00$ A.M. | 58 |
| 8:00 A.M. | 53 |
| 9:00 A.M. | 48 |
| 10:00 A.M. | 45 |

The average for the three hour missing data period is:

$$
\text { average emissions }=\frac{45+50+53+58+53+48}{6}=51.2
$$

The completed filled in data sheet should read as follows:

EXAMPLE 2 (continued)

| HOUR | DATA POINT (LB/HR) |
| :---: | :---: |
| 1:00 A.M. | 45 |
| 2:00 A.M. | 50 |
| 3:00 A.M. | 53 |
| 4:00 A.M. | 51.2 |
| 5:00 A.M. | 51.2 |
| 6:00 A.M. | 51.2 |
| 7:00 A.M. | 58 |
| 8:00 A.M. | 53 |
| 9:00 A.M. | 48 |
| 10:00 A.M. | 45 |
